## **DETAILED ACTION**

### ***Specification***

The disclosure is objected to because of the following informalities: In section [0004], line 2, "machining lenses as many as the beam splits" is nonidiomatic language. [0005], lines 2 and 3 describe two documents, but the same number "314188/1999" is used to identify both documents.

Appropriate correction is required.

### ***Claim Rejections - 35 USC § 102***

(a) the invention was known or used by others in this country, or patented or described in a printed publication in this or a foreign country, before the invention thereof by the applicant for a patent.

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

Claims 1-3 are rejected under 35 U.S.C. 102(b) as being anticipated by USPN 5,521,628 to Montgomery. See the Figures and the Specification. Montgomery describes simultaneously irradiating a plurality of work locations with beam splits which are essentially parallel.

Claims 1-3 are rejected under 35 U.S.C. 102(a) as being anticipated by both USPN 6,804,269 to Lizotte et al and USPN 6,875,951 to Sakamoto et al. See the Figures and the Specification. Both Lizotte et al and Sakamoto et al describe simultaneously irradiating a plurality of work locations with beam splits which are parallel.

### ***Conclusion***

The prior art made of record and not relied upon is considered pertinent to applicant's disclosure. The cited art pertains to laser beam machining.
